

RAPIDRUN™

- Saves Time & Money**
- Offers High Performance & Quality**
- Allows For Easy Upgrades**
- Fast, Complete A/V System**
- Do More!**

The control room of a television or radio broadcast studio is complex and intricate. With so many components involved, your typical installation can seem overwhelming and intimidating, but with RapidRun, the entire studio can be connected in record time with no error!

RapidRun was designed to answer a need for a complete cabling solution within the emerging audio/video market among varying industries, and although RapidRun has only just scratched the surface of the broadcast industry, we guarantee the best product and top customer service available today.

The Runner is specifically intended to fit through tight spaces allowing it to hide behind walls or equipment. And what's more is RapidRun has the capability to carry multiple signals over a single Runner so saving space is even easier.

When it's time for an equipment upgrade, there's no need to pull new cable because the Runner that's already installed can be re-tasked to work with your new connection.

The RapidRun Runner cables easily meet the needs of today's most elaborate audio/video systems and those still to come.

It All Comes Together!
