

RAPIDRUN™

Saves Time & Money
Offers High Performance & Quality
Allows For Easy Upgrades
Fast, Complete A/V System
Do More!

Corporations are becoming technology rich and equipping their conference rooms with projectors, plasma screens, high fidelity sound systems, microphones and video equipment. State-of-the-art conference rooms are being installed with technology that enables users to share PC and video-based presentations, as well as data and software applications. RapidRun is the perfect fit for installing and upgrading conference rooms, home theaters, video displays and other in-wall applications. RapidRun is the fast, complete audio/video cabling system - built to save installation time, accommodate changes and reduce the likelihood of return service calls due to faulty field terminations.

It All Comes Together!

"We purchased RapidRun HD15 (UXGA) with Break-Away Flying Leads so we could run 42" plasmas for a video wall. They work great! We had conduit installed already, so these cables allowed us to use the current conduit and attach the ends versus running new conduit to accommodate the large ends. We found your website and your sales staff to be very helpful. They answered our questions well. Service goes a long way, baby!"
