

RAPIDRUNTM

- Saves Time & Money**
- Offers High Performance & Quality**
- Allows For Easy Upgrades**
- Fast, Complete A/V System**
- Do More!**

RapidRunTM is the most complete Audio/Video cabling system – built to save installation time, accommodate changes and reduce the likelihood of return service calls due to faulty field terminations. Multiple signal types can be supported over your choice of Runner cable – such as VGA, Composite Video, S-Video, Component Video or HDMITM and DVITM.

RapidRun requires absolutely No Field Termination which enables faster installations and reduces mistakes that could typically keep your home theater installations from picture perfect clarity. It allows easy upgrades to existing equipment, and is designed to evolve with your constantly expanding needs.

“I ran a RapidRun 35ft digital Runner cable and a 35ft home theater (5-coax) Runner cable from behind my A/V rack to my ceiling-mounted projector. I also installed the Wall Plates at both ends. It’s nice to know that I won’t have to run another cable for my projector again.”
